

WAITERLESS RESTAURANT SYSTEM

By: Ajay Pratap Singh
Roll No:16001001002
Batch:CSE 3rd Year

What I Used?

FRONTEND
(JAVA)

BACKEND
(MySQL)

Devices :

1. A Local Server
2. A Computer for Manager
3. A Device on each Table
4. A Device in the Kitchen

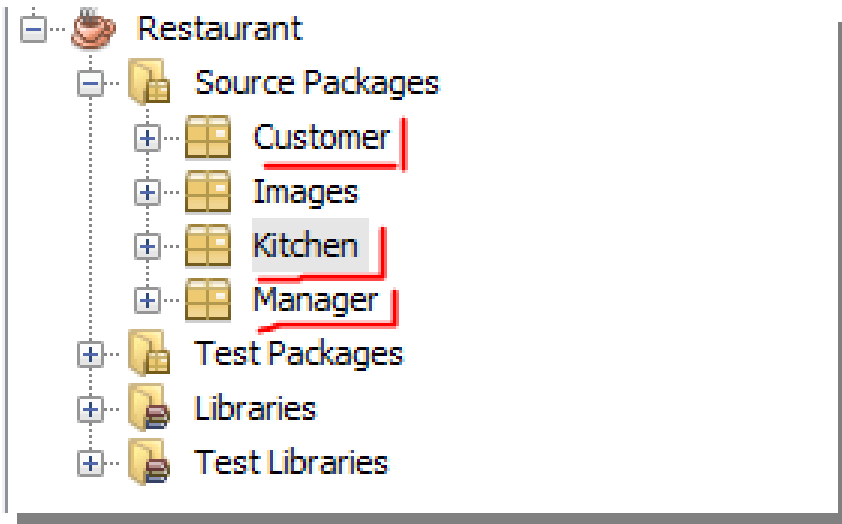

Devices :

Devices :

Project Structure:

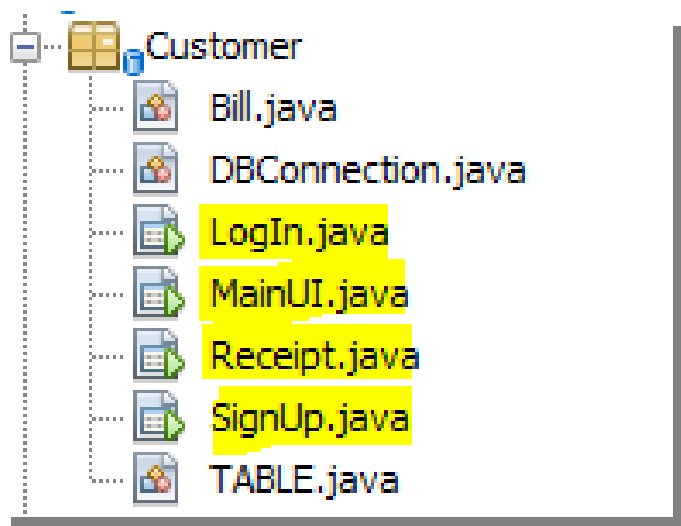

3 Modules:

- Customer
- Kitchen
- Manager

All three modules are independent and can be used independently for each type of device.

Customer Module

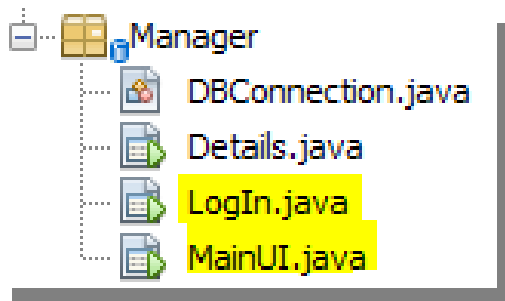

Contains 4 Forms:

- Login
- SignUp
- MainUI
- Receipt

Login form is the main form which will be open when a customer first sees the device.

Manager Module

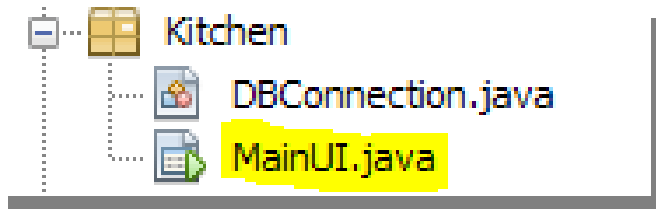

Contains 2 Forms, 1 PopUp:

- LogIn
- MainUI
- PopUp : Details

LogIn form is the main form which will be open when a Manager first runs the application on Computer.

Kitchen Module

Contains 1 Form:

- MainUI

MainUI form is the main form which will be open when the application is run on device in kitchen.

Demonstration

Working Demo of the Project

Serving Food

In waiter-less restaurant, the restaurant can follow any two approaches:

- Self-Service
- Conveyor Belt

Images >>

Conveyor Belt

THANK YOU!!
